

### Data Advisory Meeting 4/12/19:

Uses of ReportNet? Are people using it? How can it be better? Any new reports needed?

- Problem: All 8<sup>th</sup> grade takes Algebra 1 and then there are students who do not take a math regents in HS.
  - Cohort on track – add the date the test was taken? Could be feasible but we think the report may only have the highest score.
  - Exam can only be used once for accountability. If Algebra 1 was used for accountability in MS, it cannot be used at the HS if the student retakes the exam.
- Is there a way to configure some new reports to help take the mystery out of where SED is getting some numbers?
  - State black box calculations
  - Anything with Business Rules we can configure a report for.
- Maybe a report that did a cross check between courses enrolled and exams needed would be helpful
- Regents Roster Lists with LEP/SWD designated

### Civil Rights Data Collection

- SMS systems have “some” data reporting features
- Limit is what data is available in the data warehouse

### CTE

- CTE data quality? How do we know it’s correct?
- BOCES CTE for Western and Eastern is communicated out well
- Internal CTE is there quality control there? ESSA accountability for College and Career Readiness
- Training around CTE and how to account for it? What counts as a program? Work-based coordinator, would that be their responsibility?

Course Instructor Assignment/Class Entry Exit – will eventually be used as the data source for BEDS

TAA will probably still be used just as a read only verification tool
